## What is the Future for Malaysian Communities?

This inaugural Conference addresses current changes in society and the future of our communities.

Is spiraling inflation, increasing cost of fuel and transportation, basic necessities and essentials, crime and bureaucracy the characteristics of modernity and urbanity?

Traditional communities have worked well for centuries. Is there a workable model for Modern Communities?

This conference brings together experts to look into some relevant aspects that need our attention including; the role of vision, planning and public participation, the concept of neighbourliness, safety for all, the environment and evolution of the mall as the modern-day public gathering space.
