

BUILDING INSPECTION TRAINING COURSE—Kuala Lumpur

Property Inspections are becoming a necessity. The demand for independent professional inspections by accredited Building Inspectors (Architects and Engineers) for new and existing buildings has been increasing largely due to heightened consumer expectations on quality workmanship, compliances to specification & drawings, and for the proper maintenance & management of their assets. Building defects and deficiencies that are unreported or undetected has brought untold financial and social impacts to Owners and communities at large. The course content is presented in a bespoke hand-on workshop environment by experienced practitioners and Inspectors. The “Kisah Benar” Series (based on true stories and actual events) will allow candidates interesting learning opportunities on report writing, defects identification and corrective remedies.

This Course is tailored for Architects, Engineers, Property & Asset Managers, Project Managers, Contractors, Building Supervisors, Technicians & JMC members.

MEET OUR PROFESSIONAL TRAINERS

“Trainers, Speakers and Topics may vary -please refer to Course Content.”
