

IBS

PROFESSIONAL TRAINING

In collaboration with:

INTRODUCTION

By 1st January 2018, the government mandates all private sector development projects (within the Greater Klang Valley) with a gross development value of RM50 million and above to achieve a minimum IBS Score of 50. This new law will be then enforced in the states of Selangor, Johor and Penang in 2020. Thus it is essential for all professionals and stakeholders in the construction industry to educate themselves with the necessary knowledge and gained skills to fulfilled this new requirement.

ABOUT

Participants will provided a brief introduction to Industrialised Building Systems and go on to understand various concepts of IBS which includes topics such as Modular Coordination, IBS Score, Design concepts of precast components, and IBS Project Management.

Comprising of 5 Modules to be covered over a duration of 3 days, the participants will be able to :-

- understand and differentiate the various types of IBS,
- use the knowledge gained to initiate any IBS projects,
- understand the importance of modular coordination and recognized MC drawings,
- apply the benefits of IBS to any projects,
